

Fraser Lake Sawmills Fraser Lake, British Columbia

Over 10 years ago, when Safety Vision began doing business with Fraser Lake Sawmills, we supplied them with a Clarion black & white mobile video camera system. Today, we offer a full suite of accident prevention camera systems, including updated color Clarion cameras as well as Safety Vision's own line of collision avoidance components and systems.

"I am pleased to report that your camera system has been trouble-free for over 10 years. That's pretty remarkable, considering the often extreme log-yard conditions it has been operating under..."

*—Geoff Bedford,
Mobile Equipment Superintendent
Fraser Lake Sawmills
Fraser Lake, British Columbia*

"In July of 1994, we installed one of your camera and monitor systems on our log stacker—a large piece of equipment that can grab a 65-ton load of logs in one 'gulp,' lift it off a logging truck, and then stack the load in the log yard. This is heavy duty equipment doing heavy duty work.

"I am pleased to report that your camera system has been trouble-free for over 10 years. That's pretty remarkable, considering the often extreme logyard conditions it has been operating under—dust, snow, rain, temperatures ranging from -40°F to 100°F. You'd be amazed!

"In December 2004, we finally encountered a minor problem with the system after more than 10 years of uninterrupted service. The simple, inexpensive solution was to replace the camera-to-monitor cable. Your customer service department responded in notably prompt, courteous fashion. All in all, we've experienced truly remarkable performance from Safety Vision."
