

SafetyView® PRO Viewing Software

SafetyView® PRO is our dynamic mobile digital video recorder (MDVR) video viewing software. In addition to the advanced playback features, it offers powerful search and export features in a user-friendly and intuitive graphical user interface.

SPECIFICATIONS

SafetyView PRO 3.0

Supported MDVRs	PatrolRecorder™ 4C, RouteRecorder® 4C, RoadRecorder® 6000 PRO <i>(Additional MDVRs in development)</i>
Supported File Output	Video: Vision, AVI Still frames: JPEG, BMP, TIFF
Minimum Software Requirements	Windows XP SP3, Microsoft .NET Framework 3.5
Minimum Hardware Requirements	2GB of RAM, 1GB of hard drive space, 2GHz single core processor
Recommended Hardware Requirements	2.4GHz dual core processor, discreet graphics card, additional or external hard drive storage

Complete Playback Control

In addition to standard playback controls, such as Stop, Pause, and Fast Forward, SafetyView PRO 3.0 offers a frame-by-frame Step control, as well as a Jump Back button that automatically rewinds five seconds.

Multiple Viewing Configurations

View 1 camera, 4 cameras, 6 cameras, 9 cameras, or 10 cameras in any user-customized configuration. An additional channel displays available global positioning system (GPS) data on a map in real time.

Advanced Video Search

SafetyView PRO 3.0 utilizes an innovative and intuitive Calendar Search that allows you to search video by date and time to find the critical evidence you need. Events are clearly marked in contrasting red.

Health Status

Use the supported USB QuickView hard drive reader or attach directly to a RoadRecorder® 6000 PRO and view the health status of the MDVR to easily analyze performance.

Features

- Supports law enforcement, mass transit, and pupil transportation industries
- Integrates seamlessly with our SafetyNet Central Management System (CMS)
- Advanced Export function creates video clips in multiple formats

SafetyNet CMS

Use SafetyView PRO 3.0 to connect to the SafetyNet Central Management System (CMS) wireless solution and gain the ability to search and view your entire library of stored video directly from your desktop.

Any client computer with SafetyView PRO 3.0 connected to the SafetyNet CMS server can search the video database using the same familiar Calendar Search. Find crucial video events without ever touching a hard drive.

For a demonstration of SafetyView PRO 3.0, contact your Safety Vision account executive.

Part Number Information

Use the following to determine the part number of the SafetyView PRO viewing software that fits your needs.

Example:

SVSVP-X

Industry (X).

Select from:

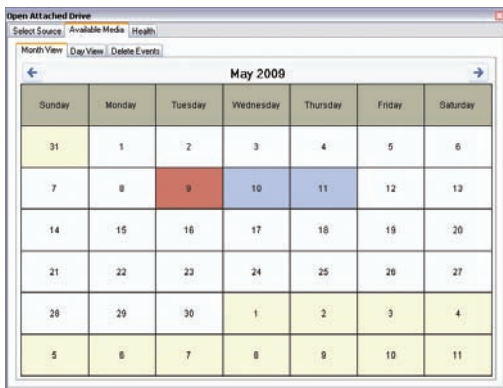

- S (School)
- T (Transit)
- LE (Police)

Architecture and Engineering Specifications

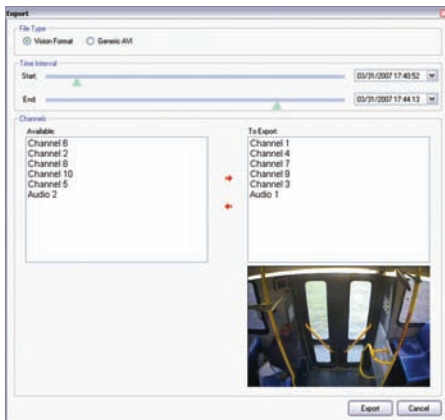

The mobile digital video viewing software shall be SafetyView PRO 3.0. The viewing software shall play back 10 separate video channels. The viewing software shall play back 10 separate audio channels synchronized with the video channels. The viewing software shall have a customizable display area. The viewing software shall display GPS data in real time. The viewing software shall display active sensors in real time. The viewing software shall have the ability to search attached hard drives as well as databases. The viewing software shall have the ability to search video by date and time. The viewing software shall identify event video in both searches and playback. The viewing software shall export customized video clips complete with audio and metadata. The viewing software shall export single frames in multiple digital formats complete with metadata. The viewing software shall provide the health status of the mobile digital video recorder providing for advanced performance analysis.
